# Our History

The term Laguiole refers to a provenance and a style of knife. They have their origin in the village of Laguiole in France, located in the Aubrac, on a high plateau of volcanic and granitic rock, wild and proud, where the formidable history of these knives was born. The style is that of an original farmer's knife, with curved lines, the bee and the guilloche pattern on the spring. The international recognition has resulted in many misleading imitations from all over the world. As a regional knife, the authentic Laguiole is not only inspired by the style Laguiole, but it has to be handmade in the village of Laguiole.

**1828** The first cutler Casimir-Antoine MOULIN settled in Laguiole to execute his profession and living thanks to that. This was the first step for the profession as a cutler.

**1850** The straight Laguiole gradually evolved and by the 1860s, the current shape of the Laguiole knife appeared and became gradually refined.

**1880** The 3-piece knife appeared, made of a blade, a corkscrew and an awl. The corkscrew is linked to the demand from the Aveyronnais, who set off to conquer the Parisian cafés. As for the awl, it was used in the agriculture sector, mainly to pierce the bellies of animals and save them from death.

**1909** The first bee appeared on Laguiole knives. A legend says, that its presence on the knives was a tribute paid to the courage of the people of Laguiole by the emperor Napoleon himself. The bee also represents the polenisation essential to the pastoral life of the Aubrac plateau.

**1914** The First World War (1914-1918) meant the disappearance of a part of the cutleries in Laguiole at this time. Only three craftsmen were producing very small quantity of Laguiole knives in the village.

**1987** A team from the Aubrac plateau, including the mayor of Laguiole, organised the relaunch of the manufacturing of the Laguiole knife in its birthplace. This led to the creation of the FORGE DE LAGUIOLE, which made this dream a reality in 1987.

# Our manufactory

The design of our manufactory was entrusted to Phillipe Starck, it perfectly reflects the company's philosophy of combining creativity and tradition. The 18-metre-high blade and the glass and aluminium architecture symbolise the company's activity and dynamism.

# Our territory

Our Forge de Laguiole® manufactory is located on a plateau at a height of 1100 meters in the core of the village of Laguiole. Its landscape impresses by its fantastic beauty and its singular tranquillity. The village of Laguiole and its special energy, inspires our cutlers day after day.

# Size guide

## Folding knives

When we mention the size of our knives, we refer to the length of the knife handle, when it is closed. The handles of our Forge de Laguiole knives are available in several sizes : 7, 9, 11 and 12 cm lengths.

**Our advice on choosing the ideal knife size:**

**12cm length models** : Perfect for an everyday use, which is generally the size we recommend for men.

**11cm length models** : Also perfect for an everyday use, with a grip suitable for a lady or a teenager.

**9cm length models :** Designed to be easy to carry, so you can bring them into a bag or take them for picnics. It's a good compromise between ease of storage and efficiency of use. This size may also be suitable when buying a first knife for a child or teenager.

**7cm models** : These much more discreet knives are perfect as a gift idea to take with you as a reminder of Forge de Laguiole.

Of course, this advice is for guidance only, and can be adapted on a case-by-case basis.

## Table knives

Our table knives from the Tradition range all have a 12cm length handle. The total length of the knife is nearly 23cm.

# Maintenance guide
## Folding knives

### BLADE

Our folding knives have a stop, which prevents the blade from pressing into the spring when the knife is closed. We recommend not to let the blade snap shut when closing it to avoid blunting the edge with an abrut closure. We recommend to clean the blade with a soft cloth or a bit wet sponge and then wipe it immediately with a dry cloth.

### HANDLE

A Laguiole knife should not be washed, it must be wiped. The natural materials of the handle, like precious woods or horn, are sensitive to humidity. It is therefore preferable to keep your knife in a dry place. A wooden knife can get a slight patina over time. To protect it and keep its beautiful appearance, you can apply a little linseed or camellia oil to nourish the wood.

### MECHANISM

To maintain the mechanism of your folding knife, it is necessary to add a drop of oil to the joint between the blade and the spring from time to time. Over the years, this will ensure that your Forge de Laguiole knife opens and closes easily and prevent it from becoming damaged.

### SHARPENING

For a regular sharpening in order to preserve the optimal quality of the edge of your blade, we advise you to sharpen it on a natural stone. Moisten the stone for about ten minutes before sharpening by keeping a sharpening angle of 20°. Be sure to sharpen your knife regularly to keep its edge.

You can find all our maintenance tips online.

# Maintenance guide

## Table knives

### BLADE

We recommend to clean the blade with a soft cloth or a bit wet sponge and then wipe it immediately with a dry cloth.

### HANDLE

The natural materials of the handle, such as precious woods or horn, are sensitive to humidity. It is therefore preferable to keep your knife in a dry place. For storage, we recommend a box or a knife case instead of a drawer.

### CLEANING

At Forge de Laguiole we have produced waterproof knives for easy maintenance. They are symbolised by the following icon :  You can put them in contact with water, which makes the daily use easier. However, we do not recommend to put the knives in the dishwasher, to preserve the beauty and the longevity. The detergents used can cause premature damage to the handles. We recommend washing them by hand with a mild soap and drying them immediately after washing.

## Sommelier knives

### HANDLE

The natural materials of the handle, such as precious woods or horn, are sensitive to humidity. It is therefore preferable to keep your knife in a dry place. A wooden handle can have a slight patina over time. To protect it and keep its beautiful appearance, you can apply linseed or camellia oil to nourish the wood.

### MECHANISM

To maintain the mechanism of your Sommelier, it is necessary to add a drop of oil from time to time  When using the Sommelier, the screw must be placed vertically in the center of the cork. The corkscrew must be kept straight, in the continuity of the neck of the bottle.

# Forge de Laguiole folding knives are a true reference in quality.

### BEE & SPRING

In all our ranges, Tradition, Edition and Collection, the bee and the spring are forged* from a single piece. In the Tradition range, the guillochage is done mechanically under a press. The bee and the spring in the Edition and Collection range are chiseled by hand. All our 9, 11 and 12cm folding knives have a forged spring and a hot-forged blade made in our manufactory.

### BLADE

The blades are hot-forged at almost 1000° in our manufactory from a French steel: the T14. This steel is the result of a clever combination of carbon and chromium, and ensures exceptional sharpness, excellent durability of the cut and remarkable ease of sharpening, while ensuring the blade remains unaltered.

### BOLSTERS

All our knives in the Tradition range have bolsters. They can be made from brass or stainless steel, and they protect the handle for a daily use. Stainless steel bolsters are massive and are hot-forged in our manufactory. They can have a shiny or a satin finish. Brass bolsters are always shiny.

***Unless otherwise specified or old models.**

# Each Forge de Laguiole knife is the result of the meticulous work of ours cutlers, who perpetuate a know-how handed down from generation to generation.

From the design to the finishing, the manufacturing steps of an original Forge de Laguiole® folding knife take place in our manufactory in Laguiole.

An original Forge de Laguiole® knife is the result of the combination of extraordinary materials of exceptional quality. The blades are hot-forged at almost 1000° in our manufactory from a French steel: the T14. The handles are carefully crafted from noble and natural materials such as wood or horn thanks to a miticulous selection

The making of the original Forge de Laguiole® knife is framed by strict guidelines. We combine the know-how of our Master-cutlers, with the precision of a goldsmith – from the assembly to the polishing, and from the hand chiseling to the sharpening.

## COLLECTION

*Genuine works of art, meticulously hand chiseled*

The Forge de Laguiole folding knives of the Collection range reflect the excellence of our know-how. The models in this range feature a bee and a spring entirely hand-chiseled by one of our master-cutlers.

The Collection range allows you to make your customized Forge de Laguiole folding knife. It's up to you to choose the features of your knife: size, type of blade, handle material, bolsters and, last but not least, the options of chiseling of the plates. On this page, you will find any kind of options that we propose for the Collection range.

*Carbon «Leopard»*

## PLATES

The plates are the metal parts between the spring and the material of the knife handle. The double plate option enhances the spring and slightly increases the thickness of the handle. We offer this option either with a chiseling only on top or all around the handle. Usually, the double plates are a combination of brass and stainless steel plates, but it is possible to have 2 plates in stainless steel on request.

# TABLE
## TRADITION

*Tradition, authenticity and refinement*

The Forge de Laguiole knives from the Tradition range and the table sets bring authenticity and sophistication thanks to the nobility of the materials and their fluid and silky cutting.
